Building Molecules

Using the equipment provided build the following compounds. The formula of a compound tells you not only which elements are present but also indicates the ratio of atoms of the different elements. For example in the compound NH_3 there are three hydrogen atoms for each nitrogen atom.

Compound	Formula	Number of elements	Elements included
Copper sulfate	$CuSO_4$	3	Copper, sulfur, oxygen
Zinc sulfide	ZnS		
Ammonia	NH_3		
Sulfuric Acid	H_2SO_4		
Hydrochloric Acid	HCl		
Table Salt	NaCl		
Lead Oxide	PbO		
Magnesium Chloride	$MgCl_2$		
Potassium Nitrate	KNO_3		
Aluminium Hydrogen Carbonate	$Al(HCO_3)_3$
