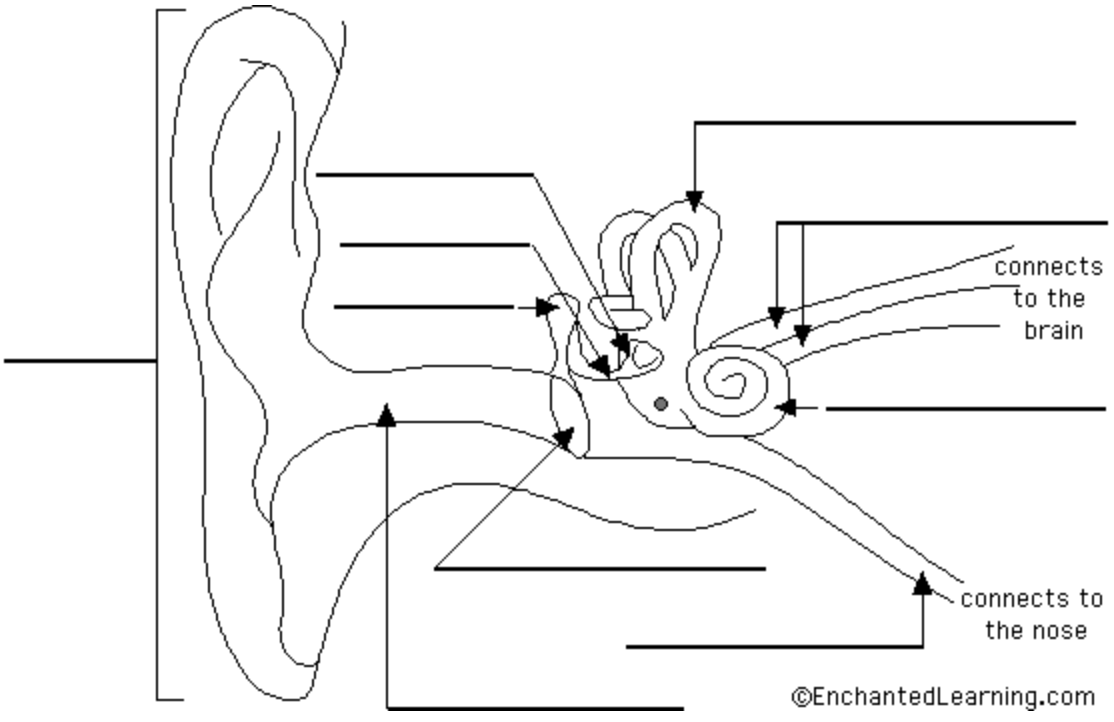
# The Ear

Use the following words to fill in the spaces below: Pinna, auditory, eardrum, hammer, anvil, stirrup and nerve.


Sound waves are collected by the _____. The sound travels along the _____ canal until it reaches the _____. The eardrum is very sensitive and vibrates when the sound hits it. The eardrum vibrates against three small bones and makes them vibrate also. The three bones are called the _____, _____ and _____. The name for all three bones together is the ossicles. These three bones help amplify the sound. The three bones transfer the vibrations into the cochlea. The cochlea contains tiny nerve hairs that turn the vibrations into nerve messages which are sent to the brain. The nerve messages travel along the auditory _____ to the brain.
