Nitrogen Cycle Video

Air is mostly made out of _____

Nitrogen is a key component of _____

How do humans get nitrogen into their bodies? _____

How does nitrogen get into the soil? _____

Attaching nitrogen to hydrogen to make ammonia is called f_____. This happens with the help of **nitrifying bacteria**

How does nitrogen return to the soil? _____

Denitrification causes nitrogen to go back to the _____. This happens with the help of **denitrifying bacteria**

Give one reason way which humans influence the nitrogen cycle

_____

_____

_____

_____

Carbon Cycle Video

What is the process where plants use carbon dioxide to make stores of energy?
p_____

Does digestion produce greenhouse gases? Yes/no

Does decomposition produce greenhouse gases? Yes/no

When dead plants and animals are trapped and compressed under the earth they become _____

List 3 ways that humans are impacting the carbon cycle

_____

_____

_____

Processes:

Photosynthesis

Decomposition

Respiration

Combustion

Diffusion
