Finding the Average Speed using the Ticker Timer

Section	Time (seconds)	Length of section (mm)	Time intererval of each section)s)	Average speed of section(mm/s) = Length divided by 0.1
1 First 5 dots	0.1		0.1	
2 Second group of 5 dots	0.2		0.1	
3 Third group of 5 dots	0.3		0.1	
4 Fourth group of 5 dots	0.4		0.1	
5 Fifth group of 5 dots	0.5		0.1	

What can you say about the average speeds of the different sections?
