Writing Equations 2

Write balanced chemical equations for each of the following:

1. Potassium bicarbonate + Nitric acid → Potassium nitrate + Water + Carbon dioxide
2. Aluminium carbonate $\xrightarrow{\text{heat}}$ Aluminium oxide + Carbon dioxide
3. Iron(III) carbonate + Hydrochloric acid → Iron(III) chloride + Water + Carbon dioxide
4. Copper sulphate + Iron → Copper + Iron(II) sulphate
5. Ammonium hydroxide + Sulphuric acid → Ammonium sulphate + Water
6. Chromium hydroxide + sulphuric acid → Chromium sulphate + Water
7. Iron(III) oxide + Carbon → Iron + Carbon dioxide
8. Ammonium bicarbonate $\xrightarrow{\text{heat}}$ Ammonium carbonate + Water + Carbon dioxide
9. Potassium + Water → Potassium hydroxide + Hydrogen das
10. Sodium hydroxide + Sulphuric acid → Sodium sulphate + Water
11. Magnesium + Oxygen gas → Magnesium oxide
12. Sodium + Water → Sodium hydroxide + Hydrogen gas
13. Calcium carbonate + Hydrochloric acid → Calcium chloride + Water + Carbon dioxide
14. Zinc oxide + Phosphoric acid → Zinc phosphate + Water

15. Ammonium carbonate + Nitric acid → Ammonium nitrate + Water + Carbon dioxide
