Narrogin Senior High School Name: _____

Year 10 Science

Due: _____

Outcomes:
Science as a Human Endeavour; Science Inquiry; Science Understanding: Earth and Space Sciences

Working individually, <u>select up to 10 marks worth</u> of questions to research, using internet and library resources. You will have one lesson to research and one lesson to produce a poster.
***** means either carbon, nitrogen or water depending on which cycle you chose.**

Make sure you include a reference with each answer.

1. *List the names of the main compounds/forms that *** is found in (1 mark)*
2. *Describe three ways human activity impacts on the cycle (3 marks)*
3. *Explain how *** is released into the atmosphere (2 marks)*
4. *Explain how *** is removed from the atmosphere (2 marks)*
5. *List the percentage of *** in the atmosphere, the earth's crust (1 mark)*
6. *List the names of all the processes that change *** from one form to another 1 mark)*
7. *Describe where and how problems occur within the cycle or ways that the cycle can be disrupted (3 marks)*
8. *Give an example of how the cycle works using a flow chart (3 marks)*
9. *Describe where in the process large amounts of *** are stored (2 marks)*
