3. Element with the symbol Al.

4. Element with the symbol Ne.

5. Electrons _______ around the nucleus.

9. Element with the atomic number of 1.

11. Element with the symbol Zn.

12. Atoms with the same number of protons are referred to as an ___________.

15. Part of an atom which has a negative charge.

16. Protons + Neutrons = _____________.

17. An atom of Boron has 5 protons and 6 neutrons. What is its atomic weight?

Down

1. Part of an atom with a positive charge.

2. One of the three states of matter.

3. The number of protons an atom has can also be called the ____________ ____________.

6. Protons and neutrons are contained in the ____________.

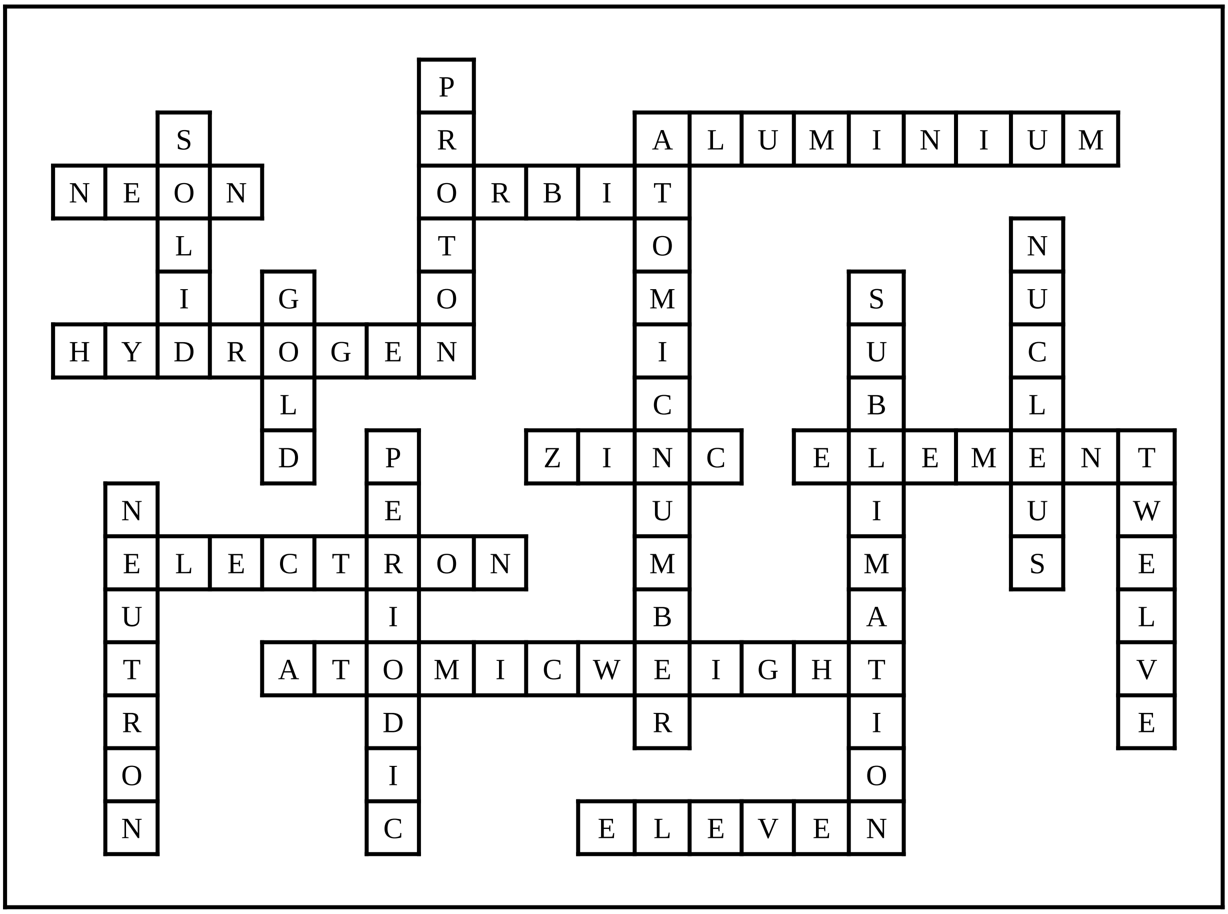
7. Element with the symbol Au.

8. Phase change from solid to gas.

10. Elements are arranged in order of increasing atomic number in the __________ table.

13. A sodium atom has 11 protons and an atomic weight of 23. How many neutrons does it have?

14. Neutral part of an atom.



PROTON
SOLID
ALUMINIUM
NEON
ORBIT
