Animal Adaptations Assignment

You will need to research an animal of your choice and describe its habitat, environment, adaptations and how humans have impacted the animal. You will need to present your information as an annotated diagram on an A3 sheet of paper.

On your diagram, you will need to include the following information:

- The name and a diagram of the animal
- A description of its habitat and environment
- Five adaptations the animal has (two structural, two behavioural and one of your choice)
- What sort of human activities are affecting your animal

Use the questions below to organise your research.

Describe the animal's habitat and the environmental conditions in the habitat.

_____
_____
_____
_____
_____
_____

Describe one structural adaptation the animal has and how it benefits the animal.

_____
_____
_____
_____
_____
_____

Describe a second structural adaptation the animal has and how it benefits the animal.

_____
_____
_____
_____
_____
_____

Describe one behavioural adaptation your animal has and how it benefits the animal.

_____
_____
_____
_____
_____
_____

Describe a second behavioural adaptation your animal has and how it benefits the animal.

_____
_____
_____
_____
_____
_____

Describe one other adaptation your animal has and how it benefits the animal.

_____
_____
_____
_____
_____
_____

Describe one way in which humans have affected your animal.

_____
_____
