Measuring your kinetic energy!

Name: _____

You will be calculating the kinetic energy you have when you run across the basketball court.

Step one: measure the length of the basketball court using a trundle wheel.

LENGTH OF BASKETBALL COURT= _____m

Step two: measure the time it takes to run from one end of the basketball court to the other using a timer.

You need to work out your velocity in **metres per second**. Show your working below:

SPEED= _____ m/sec

Step three: measure your mass using the scales.

MASS = _____

Step four: work out your kinetic energy in joules.

Kinetic energy = ½ x objects mass x (objects speed)^2 *or*

$E_k = ½ ms^2$

Your kinetic energy in joules _____
