Weather and Climate (p183-184)

Weather and Climate

1. What is the definition of weather?

2. What is climate?

Influences on Climate

1. How is the sun important?

Surface of the Earth

1. Describe how the surface of the earth determines how much energy from the sun is reflected back into space.

2. What would happen if the Earth was covered in forests?

Gases in the Atmosphere

1. What type of energy comes from the sun?

2. What happens to this radiation?

3. Which two gases make up most of the atmosphere and what effect do they have on radiation?

4. Name the four gases that act differently. Describe the effect they have on radiation coming from the sun.

5. What name is given to these gases?

6. Draw a simple diagram to show the effect of greenhouse gases on Earth’s atmosphere. Explain what is happening in your diagram.
