Balanced Equations 2

Write balanced chemical equations for each of the following:

1. Potassium bicarbonate + Nitric acid → Potassium nitrate + Water + Carbon dioxide
2. Aluminium carbonate (heat) → Aluminium oxide + Carbon dioxide
3. Iron III carbonate + Hydrochloric acid → Iron III chloride + Water + Carbon dioxide
4. Copper sulphate + Iron → Copper + Iron II sulphate
5. Ammonium hydroxide + Sulphuric acid → Ammonium sulphate + Water
6. Chromium hydroxide + sulphuric acid → Chromium sulphate + Water
7. Iron III oxide + Carbon → Iron + Carbon dioxide
8. Ammonium bicarbonate (heat) → Ammonium carbonate + Water + Carbon dioxide
9. Potassium + Water → Potassium hydroxide + Hydrogen das
10. Sodium hydroxide + Sulphuric acid → Sodium sulphate + Water
11. Magnesium + Oxygen gas → Magnesium oxide
12. Sodium + Water → Sodium hydroxide + Hydrogen gas
13. Calcium carbonate + Hydrochloric acid → Calcium chloride + Water + Carbon dioxide
14. Zinc oxide + Phosphoric acid → Zinc phosphate + Water
15. Ammonium carbonate + Nitric acid → Ammonium nitrate + Water + Carbon dioxide
