Isotopes (p6)

1. What is an isotope?

   _____

   _____

   _____

   _____

   _____

2. What does the number next to an isotope signify?

   _____

   _____

   _____

3. Give an example of two isotopes.

   _____

Writing Atomic Symbols (p6)

1. Write the atomic symbol for Helium. _____
2. The atomic symbol is made up of
   - _____
   - _____
   - _____

For each of the following isotopes, write the number of protons, neutrons and electrons, as well as its atomic symbol.

	Chromium -52	**Chromium-50**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

	Carbon – 12	**Carbon - 14**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

	Nitrogen – 14	**Nitrogen – 15**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

	Sulphur – 32	**Sulphur - 33**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

	Sodium -23	**Sodium -22**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

	Selenium - 79	**Selenium - 75**
# of protons		
# of neutrons		
# of electrons		
Atomic Symbol		

Fill in the isotope names and any missing information below.

# of protons	25	
# of neutrons	30	28
# of electrons		
Atomic Symbol		

# of protons	19	
# of neutrons	20	22
# of electrons		
Atomic Symbol		

# of protons		
# of neutrons	61	57
# of electrons		46
Atomic Symbol		

# of protons		
# of neutrons	78	80
# of electrons	55	
Atomic Symbol		

	Iron -	**Iron -**
# of protons		
# of neutrons	30	28
# of electrons		
Atomic Symbol		

	Iodine -	**Iodine -**
# of protons		
# of neutrons	74	73
# of electrons		
Atomic Symbol		

	Calcium -	**Calcium -**
# of protons		
# of neutrons	20	22

	-63	**-65**
# of protons	29	29
# of neutrons		

# of electrons		
Atomic Symbol		

# of electrons		
Atomic Symbol
