DNA fossils video **Name** _____

Before the video:

Why might studying DNA from the fossilised remains of living things be difficult?

_____

_

_____

_

_____

_

Why would geneticists be interested in overcoming these challenges?

_____

_

_____

_

_____

_

During the video:

What happens to DNA when living things die?

_____

_

_____

_

_____

_

What is the name of the process used to copy genes in the research lab? Why is this process necessary?

_____

_

_____

_

_____

_

After the video:

How does ancient DNA analysis provide further evidence for the theory of evolution?

_____

_

_____

_

_____

_

What challenges remain for this branch of science? How might they be overcome?

_____

_

_____

_

_____

_

Evidence for evolution
