

SEED GERMINATION RESEARCH

Name:_____

Seeds can lay dormant for a long time (they have been found in Egyptian tombs) and only start to germinate when they are triggered to do so.

Research and write:

1. What is germination?
2. What factors are necessary for seeds to germinate?
   - For each factor explain why it is necessary.
3. What is the difference between a seed and an embryo? Draw a diagram to show this.
