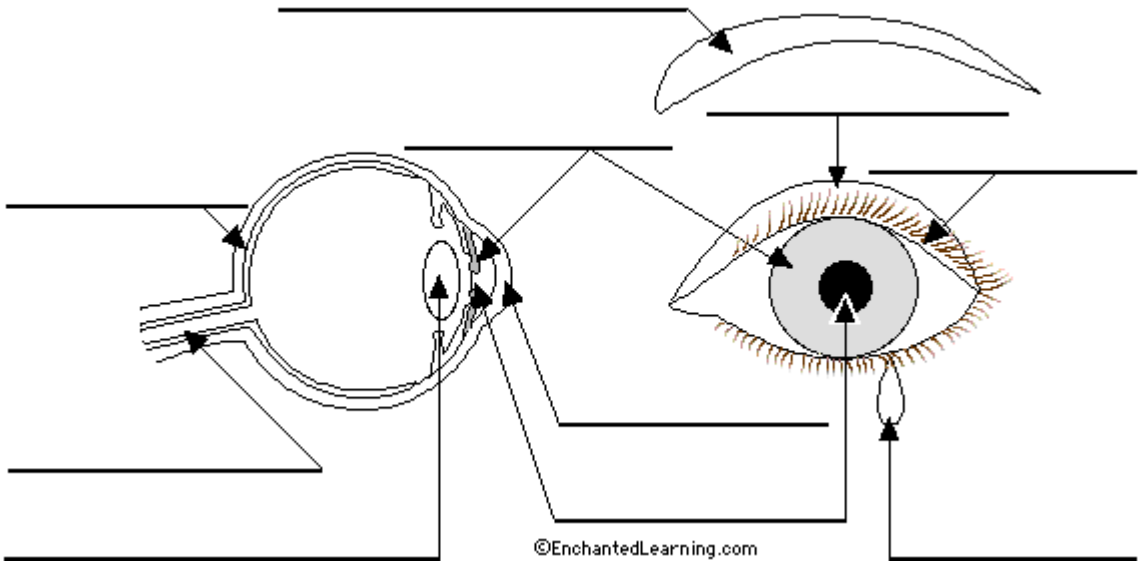
Name:_____

STATION --- EYE

Use pg137-138 to label the diagram and fill in the table



Find each part on the model

Below in table write the function of each part of the eye

Part	Function

STATION ---Reflection

Read pg125 and prac p132. Conduct the prac and draw what you see (fig 4.3.22)

Draw a diagram of reflection from plane mirror

What is the law of reflection?

STATION ---- Plane Mirror

Read pg 126, look at fig 4.3.9

Describe what a plane mirror is and what the image formed in a plane mirror looks like.

STATION ---- Refraction

Read pg 126 & 127

Look at fig 4.3.21 pg 131 Look at set up and draw what you see.

Explain the reason for this.

_____
_____
_____

STATION ---- Total Internal Reflection

Read pg 129

Look at fig 4.3.16 explain why there are 2 sharks

STATION -----BENDING LIGHT

Read pg 133. Do the activity using a glass block

Explain what happens in this task

	Angle of incidence	Angle of refraction
Light entering glass from air		
Light entering air from glass		

STATION ---- Firework Glasses

What did you see?

Why do you see this?

STATION ---- CONVEX and CONCAVE

Read pg 134--136

Draw fig 4.4.2 then explain what happens with each type of mirror / lens

Use the light box to replicate the diagrams above

STATION -----Forming an image

Read the box on pg 134

What type of lens is found in a magnifying glass?

_____

Do the activity. Explain what you saw using the words image and focus
