Our Changing Earths - Year 9 Science

~ Time	Objectives	SS - ??	Resources	Assessments
½ week	Earths Structure - core, mantle, crust - tectonic plates and movement - continental drift jigsaws		Modelling	
1 week	Earthquakes and Volcanos - tectonic plate shift types – shear, compression, tension - fault lines, pacific ring of fire - mountain ranges and rift valleys			
1 week	Rock types - igneous - metamorphic - sedimentary Histology - fossil records and timescales - weathering and erosion - climatic changes - magnetic field changes - sea level changes - Ozone layer and greenhouse effects - el Nino		"Construct a timeline" Simulation of rock types – Modelling Web: West's Geology Directory Web: Geology Fossils Web Site Web: Geology Minerals Web Site	
	Natural Disasters - volcanoes - earthquakes - tornadoes - cyclones - tsunamis - floods		"Research Assignment" & Videos	Natural Disasters Research Assignment Cyclone Video Worksheet
