Natural Selection

A quick note about Charles Darwin:

Three observations made by Charles Darwin

1 –

2 –

3 –

Darwin's Ideas: **Struggle for existence:**

Survival of the fittest:

Define **Natural Selection**:

Selective agent:

Selection pressure:

What is sexual selection? Provide examples.

Natural Selection: The main idea…

Case study of the Peppered Moth: Take notes as I talk you through this.

Natural Selection

Case study of Insects: (p.81)

Case study of bacteria: (p.82)
