Natural selection video Name _____

1. What are we assuming about the frogs?

   _____

   _____

   _____

2. What is the selective pressure on the frogs? _____
3. What does fitness mean? _____
4. What do we see over a long time? _____
5. Which is correct?

   Natural selection is change over time and happens because of evolution

   Evolution is change over time and happens because of natural selection
6. How come the small g allele can still survive? _____
7. Do mutations make the organisms more or less fitness?

   _____
8. When a trait which causes an advantage increases over time it is called an

   _____
