Balanced Equations 1

Write balanced chemical equations for each of the following:

1. Aluminium hydroxide + Sulphuric acid → Aluminium sulphate + Water
2. Zinc oxide + Nitric acid → Zinc nitrate + Water
3. Iron + Oxygen gas → Iron III oxide
4. Magnesium + Nitric acid → Magnesium nitrate + Hydrogen gas
5. Calcium hydroxide + Carbon dioxide → Calcium carbonate + Water
6. Potassium + Water → Potassium hydroxide + Hydrogen gas
7. Copper + Sulphuric acid → Copper sulphate + Hydrogen gas
8. Magnesium hydroxide + Hydrochloric acid → Magnesium chloride + Water
9. Zinc hydroxide + Hydrochloric acid → Zinc chloride + Water
10. Sodium bicarbonate (heat) → Sodium carbonate + Water + Carbon dioxide
11. Calcium + Phosphoric acid → Calcium phosphate + Hydrogen gas
12. Sodium + Oxygen gas → Sodium oxide
13. Calcium carbonate + Sulphuric acid → Calcium Sulphate + Water + Carbon dioxide
14. Iron III oxide + Nitric acid → Iron III nitrate + Water
15. Nickel sulphide + Oxygen gas → Nickel oxide + Sulphur dioxide
