ATOMIC NUMBER AND MASS NUMBER

ATOMIC NUMBER=the number of _____ in one atom of an element.

MASS NUMBER=the number of protons AND neutrons in one atom of an element.

Remember that in an element the number of electrons is equal to the number of _____.

Use your periodic table to complete this table.

Element	Symbol	Atomic number	Number of protons in one atom of the element	Number of electrons in one atom of the element	Mass number	Number of neutrons in one atom of the element. Subtract the atomic number from the mass number.
	Ca					
	Pb					
	N					
	Mg					
	N					
	O					
	Au
