Meiosis Video

http://www.watchknowlearn.org/Video.aspx?VideoID=56202&CategoryID=7580

1. How many chromosomes do your body cells have? _____ **46** _____

(1 mark)

2. Which cells don't have 46 chromosomes? _____ **sperm and egg** _____

_____ _____

(1 mark)

3. How many chromosomes do they have? _____ **23** _____

_____ _____

(1 mark)

4. Why do they have this many? _____ **so when they join they only have 46** _____

_____ _____

(1 mark)

5. What is the other name for egg and sperm cells? _____ **gametes** _____

_____ _____

(1 mark)

6. Why is meiosis called reduction division? _____ **because you start with 46 and end**

with 23 chromosomes

_____

(1 mark)

7. In meiosis how do the new cells compare to the original? ____ **they are different** _____

_____
_____

(1 mark)

8. “Mitosis makes us _____ **identical** _____”

(1 mark)

9. “Meiosis makes cells that are _____ **different** _____ from one another”

(1 mark)

10. What are cells doing in interphase? _____ **growing, replicating DNA, carrying out cell**

processes

_____
_____

(1 mark)

11. How many times does PMAT happen in meiosis? _____ **twice**
_____

(1 mark)

12. What does homologous mean? _____ **same size, same type, same location**
_____

_____
_____

(1 mark)

13. Describe crossing over _____ **transfer genetic material from one chromosome to another**

_____
_____

(1 mark)

14. What has happened by telophase I? _____ **two cells** _____

_____
_____

(1 mark)

15. How many cells are there by telophase II? _____ **four cells**
_____

_____
_____

(1 mark)

16. How many chromosomes in an sperm cell? _____ **23** _____

_____

(1 mark)

17. What can cause genetic disorders? ___ **too many or too few chromosomes, don't separate**

correctly

_____

(1 mark)
