Measuring Power

The unit of measure for power is the Watt. For very powerful things like motor cars the unit kilowatt.

1000watts=1kilowatt

To change watts to kilowatts divide by 1000.

To change kilowatts to watts multiply by 1000.

Try doing these conversions

Watts	Working	Kilowatts
1000	1000 ÷ 1000	1
2000	2000 ÷1000	
5000		
	0.5 X 1000	0.5
		0.7
1500		
		7.2
375		

The symbol for kilowatts is Kw

Look at the table below

Vehicle	Maximum power(kw)
Ford Mustang(2015)	324
Volvo Bus	213
Ford Fiesta	90
Cessna 170 light aircraft	110

Use this table to draw a **bar** graph of this table.
