N	E	U	T	R	O	P	H	I	L	M	A	N	U	E	R	X	C

? Substance that prevents the growth of bacteria
? Anything that stops your body working properly
? Chemical made by the immune system to allow white blood cells to destroy pathogens
? Can be spread from organism to organism
? The type of nodes where macrophages are found
? The immune _____ fights infections
? To make the antibodies before the disease can make you unwell
? An _____ disease can be spread
? White blood cell that makes antibodies
? White blood cell that is found in lymph nodes and consumes pathogens
? White blood cell that consumes pathogens
? Organism that causes disease
? An early antibiotic
? Isolation to prevent spread of disease
? A chemical that induces immunity
? Short for gastroenteritis
? Organ that removes pathogens from the lymph fluid
? Made from broken down white blood cells
? *Penicillium* comes from a type of _____
