Title:

Name:

Introduction (include background information about reaction rate – research and have 2 references at end)

Aim: (why you are doing this experiment)

Hypothesis:

Equipment:

- (List all pieces of equipment)

Procedure:

1. (List all steps in detail)

Variables:

- Independent – (changed – don't forget units)
- Dependent – (measured – don't forget units)
- Control – (write 5)
- Uncontrolled – (something we should have controlled but didn't)

Results:

Table title: (relate independent and dependent variables, tell us what you did)

(Independent variable – include units)	(Dependent variable – include units)			
	Trial 1	Trial 2	Trial 3	Average

Graph: from excel

Discussion: (see rubric)

Conclusion:
