Mitosis Video

https://youtu.be/f-ldPgEfAHI Mitosis: The Amazing Cell Process that Uses Division to Multiply! (Updated) (Amoeba Sisters)

1. What is mitosis?

_____

_____

(1 mark)

2. Why is it important that your cells undergo mitosis?

_____

_____

(1 mark)

3. What is mitosis NOT?

_____

_____

(1 mark)

4. What are the new cells made by mitosis like?

_____

(1 mark)

5. What would happen if cells just divided all the time?

_____

_____

(1 mark)

6. What is cancer?

_____

(1 mark)

7. What do cells do in interphase?

_____

(1 mark)

8. How much time in the cell cycle is mitosis?

_____

(1 mark)

9. What is DNA?

_____

(1 mark)

10. What sort of DNA needs to be in your new cells?

_____

(1 mark)

11. What are chromosomes made of?

_____

(1 mark)

12. How many chromosomes do humans have?

_____

(1 mark)

13. What do cells do during interphase?

_____

_____

(1 mark)

14. What happens during prophase?

_____

_____

_____

(1 mark)

15. What happens during metaphase?

_____

_____

_____

(1 mark)

16. What happens during anaphase?

_____

_____
_____

(1 mark)

17. What happens during telophase?

_____

_____
_____

(1 mark)

18. Cytokinesis is responsible for

_____

(1 mark)

19. If we didn't understand mitosis we would not understand how _____

and _____ happens.

(2 marks)
