Year 9 Disease Assignment

You are to research one of the diseases below. You will be provided with a sheet to write your notes on, which needs to be handed in. You will then use your notes to create a pamphlet about your chosen disease.

Diseases

1. Chickenpox
2. Cholera
3. Diphtheria
4. Impetigo
5. Leprosy
6. Malaria
7. Measles
8. Mumps
9. Polio
10. Rubella
11. Scarlet fever
12. Small pox
13. Tetanus
14. Thrush
15. Tinea
16. Typhoid
17. Whooping cough
18. Hepatitis B
19. Tuberculosis
20. HIV/AIDS

Your research should cover the following points:

- What causes the disease? (bacteria/fungus/virus)
- What are the symptoms of the disease?
- Who can suffer from the disease?
- How is the disease spread?
- How can the disease be prevented or treated?
- Any other important facts you uncover during your research (eg. famous people who have had the disease, is it more common in some countries etc)

You will be expected to hand in written notes, which will form part of your mark, as well as a bibliography.

A couple of websites to get you started:
