For next time:

- **This worked reasonably well.**
- **Maybe ask kids to highlight 3 dot points, then choose another 1 or two from the book or online. 6 was a bit to many and we ran out of time.**
- **Encourage kids afterwards to in turn read out their points for the others to write down rather than just copying from each other.**

Electromagnetic Radiation

- Groups of 6.
- Piece of A3 paper, divided into 6 sections.
- Learn about one of the 6 types of electromagnetic radiation.
    - Ultraviolet,
    - Infrared,
    - Gamma Rays,
    - X-Rays,
    - Radio Waves,
    - Microwaves
- In new groups, come up with 6 dot points which you will write in one of the sections of the A3 paper. You can use the sheets provided, the textbook and the internet. You have 15 minutes.
- Return to your original groups and share the information with the rest of the group about your type of radiation. By the end, everyone should have 6 dot points about each type.

- Ultraviolet,
- Infrared,
- Gamma Rays,
- X-Rays,
- Radio Waves,
- Microwaves
