Discovery of DNA

We are beginning to learn about DNA and genetics. There were many scientists who contributed to finding out what we know about DNA today.

Your task is to create a timeline of the history of DNA.
It should include at least 6 scientists and the following information:

- Name
- Year born
- Country born
- What their contribution was to the discovery of DNA
- The year the contribution to the discovery of DNA was made

You can make this timeline online on Canva (google canva).
You can sign up for Canva using a personal email or your school email
… @student.education.wa.edu.au

It MUST be in your own words. If you copy and paste, you start again.
