The Endocrine System

In the spaces below, fill in the blanks to map out a stimulus-response model for each of the hormones listed.

HORMONE	**STIMULUS →**	**RECEPTOR →**	**CONTROL → CENTRE**	**EFFECTOR →** *At least one example*	**RESPONSE →** *Associated with effector*	**FEEDBACK** *Associated with response*
Insulin			Control centre		Insulin released and triggers glucose uptake from the cells	
Thyroxine	Decrease in body temperature		Hypothalamus in the brain			
Adrenaline	Seeing a zombie coming at you					Blood is pumped faster around the body
