WRITING CHEMICAL EQUATIONS

OXIDATION REACTIONS:

Word equation:

METAL + OXYGEN GAS ⟶ METAL OXIDE

magnesium + oxygen gas ⟶ magnesium oxide

Chemical Equation:

Mg + O_2 ⟶ MgO (check with valencies)

Balanced Equation:

2Mg + O_2 ⟶ 2MgO

Try these:

WORD EQUATION zinc + oxygen gas ⟶

BALANCED
CHEMICAL EQUATION

WORD EQUATION iron II + oxygen gas ⟶

BALANCED
CHEMICAL EQUATION

WORD EQUATION aluminium + oxygen gas ⟶

BALANCED
CHEMICAL EQUATION

ACID – METAL REACTIONS:

METAL + ACID ⟶ SALT + HYDROGEN GAS

magnesium + hydrochloric acid ⟶ magnesium chloride + hydrogen gas

Mg + HCl ⟶ $MgCl_2$ + H_2

(check valencies)

(balance the equation)

Try these:

iron + hydrochloric acid ⟶

zinc + hydrochloric acid ⟶

aluminium + hydrochloric acid ⟶

copper + sulphuric acid ⟶

potassium + sulphuric acid ⟶

sodium + sulphuric acid ⟶

ACID – BASE REACTIONS:

ACID + BASE ⟶ SALT + WATER

hydrochloric acid + sodium hydroxide ⟶ sodium chloride + water

HCl + NaOH ⟶ NaCl + H_2O

(balance the equation)

Try these:

hydrochloric acid + iron hydroxide

sulphuric acid + magnesium hydroxide

nitric acid + sodium hydroxide

hydrochloric acid + potassium hydroxide

phosphoric acid + sodium hydroxide

sulphuric acid + potassium hydroxide

ACID CARBONATE REACTIONS:

ACID + CARBONATE ⟶ SALT + WATER + CARBON DIOXIDE

hydrochloric acid + sodium carbonate ⟶ sodium chloride + water + carbon dioxide

HCl + $NaCO_3$ ⟶ NaCl + H_2O + CO_2

(balance the equation)

Try these:

hydrochloric acid + copper carbonate

hydrochloric acid + zinc carbonate

hydrochloric acid + calcium carbonate

sulphuric acid + calcium carbonate

sulphuric acid + copper carbonate
