Muscular Dystrophy Research Paper

Directions
As you complete your Internet research, answer Part A about the type(s) of muscular dystrophy that was assigned to you. Please complete Part B from the information in Part A.

A. Fill in the blanks for the following questions using information from your Internet search.

a. What type of muscular dystrophy do you have? _____
b. Is it autosomal or X-linked? _____
c. Is it recessive or dominant? _____
d. What are the causes of this type of muscular dystrophy?
_____
_____
_____

e. What is the age of onset and/or the typical life expectancy of an individual with this disorder?
_____
_____
_____
_____

f. Does it affect mostly females or males? Please explain.
_____
_____

g. What are the signs and symptoms of the disorder?
_____
_____
_____

h. What type of medical treatment do individuals with this disorder receive?
_____
_____
_____
_____

i. Is there any additional information you might like to add?
_____
_____
_____

B. Compose an essay on the type of muscular dystrophy that has been assigned. You must have an introduction, at least three supporting paragraphs, and a conclusion, giving a description of muscular dystrophy, the causes of your assigned type, and its affect on the individual as well as its possible affect on the person's family. All of the information from Part A must be included in your essay. You will be graded on spelling, grammar, content, and organization. Please type your essay or write it neatly on notebook paper.
