U	I	E	L	E	C	T	R	O	L	Y	T	E	S	A
E	L	E	C	T	R	O	N	S	D	S	S	F	G	C

1. Positively charged part of an atom
2. Part of an atom that moves during the flow of electricity
3. Measures current
4. Electricity caused by a build up of charge
5. When electrons are removed what charge remains
6. Unit current is measured in
7. What happens when a charge builds up in the atmosphere?
8. Measurement of the amount of energy supplied
9. Electricity caused by the movement of a charge
10. Path electrons travel through
11. A voltmeter measures _____
12. The parts of a circuit
13. Short hand version of a circuit: a circuit _____
14. What do each of the following symbols stand for?

15. Type of cell with electrodes in a liquid
16. Type of cell with one electrode wrapped in another
17. A solution that conducts electricity
18. What type of energy to photovoltaic cells convert?
19. Unit to measure resistance
20. Materials that do not conduct electrocity
21. Used for most household wires
22. What needs to move for electricity to flow?
23. Should voltmeters be connected in series or parallel?
