GEOLOGICAL TIMESCALE

Look carefully at the time scale. This represents the last 600 million years which in geological time is quite recent. This scale ONLY represents the evolution of SOME more advanced animals and plants.

1 When did the first fish appear on earth? _____

2 When did birds first appear? _____

3 When did flowering plants first appear? _____

Note: there were many non-flowering plants before this time. Otherwise there wouldn't have been food or oxygen for animals to survive!

4 When do we think humans began to evolve? _____

5 What were the first living things to appear on earth and when did they appear?

_____

_____

6 What is superposition?

_____

_____

7 Explain why its wrong to suggest that the dinosaurs were a failure? -

_____

_____

_____

_____

8 What is the genus name for humans? _____

9 What genus did we evolve from? _____
