Physics

Physics=the study of matter and energy.

The area of physics we will look at this term is Motion.

Motion=movement.

Quantity=the size or amount of something.

Unit of measure for distance=Kilometres and meters.

Key works

word	Meaning
Distance	Measure of length travelled
Displacement	A straight line between a starting point and a finishing point.
Scalar quantity	Size but not _____ given.
Vector quantity	Size and _____ given.

Situation	Distance or displacement	Scalar or vector quantity
Bob runs 5 Km		
It is 2km from Jenny's house to school		
The total distance the simmer swam was 2Km		
I road my bike 5 km from work to footy training		
I flew 2000km from my home town to the holiday destination		
I have walked 9 km today
