1. Name, in order, all the Members that make up our solar system “family”

2. How big is the sun?

3. What are the main Gases that make up the sun?

4. What is Solar wind?

5. What is it called when Solar winds hit the earths atmosphere?

6. What does “astronomical Unit” mean?

7. How far from the sun is Mercury and what is its diameter? (make sure you record it in AU)

8. How far from the sun is Venus and what is its diameter? (make sure you record it in AU)

9. How far from the sun is Earth and what is its diameter? (make sure you record it in AU)

10. How far from the sun is Mars and what is its diameter? (make sure you record it in AU)

11. What is the collective names of the outer planets?

12. What are the inner planets made of (mostly)?

13. How far from the sun is Jupiter and what is its diameter? (make sure you record it in AU)

14. How far from the sun is Saturn and what is its diameter? (make sure you record it in AU)

15. How far from the sun is Uranus and what is its diameter? (make sure you record it in AU)

16. How far from the sun is Neptune and what is its diameter? (make sure you record it in AU)

17. How far from the sun is the Kuiper belt?

    Now you have all the information create a graph comparing planet size and a second comparing distance from sun.
