Theory 3 – Kingdoms

Animalia

Plantae

Fungi

Monera

Protista

Classifying cells of the kingdoms

Organism A
This organism has cells with a nucleus and a cell wall. It is multicellular and can use the sun to gain nutrients.
This organism belongs to the _____ kingdom

Organism B
This organism has cells with a nucleus but no cell wall. It only exists as a single cell and uses the sun to get nutrients.
This organism belongs to the _____ kingdom

Organism C
This organism has cells without a nucleus but it has a cell wall. It is a single celled organism and uses the sun for nutrients.
This organism belongs to the _____ kingdom

Key to the five kingdoms

Level 1
1a. Cells have a nucleus ……
Go to level 2
1b. No nucleus ……
… **BACTERIA**

Level 2
2a. Multicellular …… Go to level 3
2b. Single cell……
…… **PROTISTS**

Level 3
3a. Can't use the sun's energy ……**PLANTS**
3b. Uses the sun for nutrients…….. Go to level 4

Organism D
This organism has cells with a nucleus and but doesn't have a cell wall. It is multicellular and needs to find its own food.
This organism belongs to the _____ kingdom

Organism E
This organism has cells with a nucleus and a cell wall. It is multicellular and can't use the energy from the sun for nutrients.
This organism belongs to the _____ kingdom

Organism F
This organism can't use the energy from the sun and is a multicellular organism. The cells don't have cell walls.
This organism belongs to the _____ kingdom

Make your own dichotomous key

Title: Key to Identifying _____ Go To:		
Step 1	1a.	
	1b.	
Step 2	2a.	
	2b.	
Step 3	3a.	
	3b.	
Step 4	4a.	
	4b.	
Step 5	5a.	
	5b.	
Step 6	6a.	
	6b.	
Step 7	7a.	
	7b.	
Step 8	8a.	
	8b.	

A	
B	
C	
D	

E	
F
