Animal Classification

1. What are the 7 levels of classification?

   1) 5)
   2) 6)
   3) 7)
   4)

2. What are the 5 kingdoms of living things?

   -
   -
   -
   -
   -

3. How many phyla are there in the animal kingdom? _____

4. Complete the table below by:
   - Naming each phylum in the animal kingdom
   - Identifying the main characteristics of each phylum, and
   - Giving an example of an animal in the phylum.

   One has been done for you.

Phylum	**Characteristics**	**Example**
Chordates	Have a spinal chord and backbone.	Monkey

5. Complete the table below showing the classes in the chordate phylum.

Class	Characteristics	Example

6. Complete the table below showing the classes in the arthropod phylum.

Class	Characteristics	Example

7. For each of the animals below, name the phylum it belongs to.
   - Starfish
   - Monkey
   - Ant
   - Pelican
   - Prawn
   - Snail
   - Squid
   - Sea urchin
   - Tape worm
   - Leech
   - Meerkat
   - Jellyfish

8. For each of the chordates below, name its class.
   - Turtle
   - Cow
   - Lizard
   - Duck
   - Crocodile
   - Tree Frog
   - Shark
   - Magpie
   - Cane toad
   - Lion
   - Eagle
   - Tuna
   - Alligator
   - Moose
   - Echidna

9. For each of the arthropods below, name its class.
   - Dung beetle
   - Spider
   - Earwig
   - Scorpion
   - Wasp
   - Lobster
   - Millipede
   - Crab
   - Butterfly
