Ticker tapes

Student: ..... Class: .....

Describing motion

1. For each ticker tape shown, describe the motion of the body to which the tape was attached. The left-hand dot is at time zero.

(a)

.....

.....

(b)

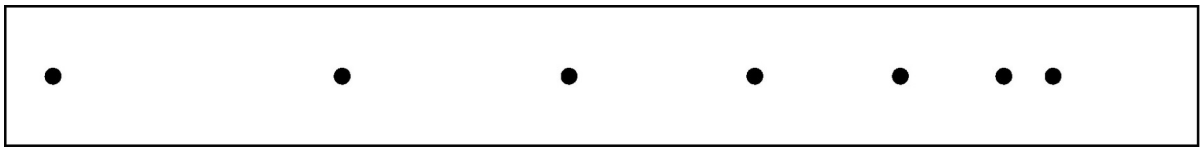

.....

.....

Measuring speed

2. The time between each of the dots on the following ticker tape is 0.02 s.

(a) Calculate the average speed of the object to which the tape was attached for each time interval. Express your answers in mm/s.

Interval	Distance between dots (mm)	Average speed (mm/s)
AB		
BC		
CD		
DE		
EF		
FG		

(b) Describe the motion of the object to which this tape was attached.
