Worksheet 10.2

Types of energy

Student: ..... Class: .....

1. Types of energy and their sources

Complete the following table by identifying energy sources for each energy type listed.

Sources: fluorescent tube, uranium fission, chocolate bar, moving tennis ball, vibrating violin string, rubber band, battery, infra-red lamp

Energy type	Source
Chemical	
Sound	
Light	
Electrical	
Heat	
Elastic potential	
Nuclear	
Kinetic	

2. Types of potential energy

Potential energy can be classified as: gravitational, elastic or chemical.

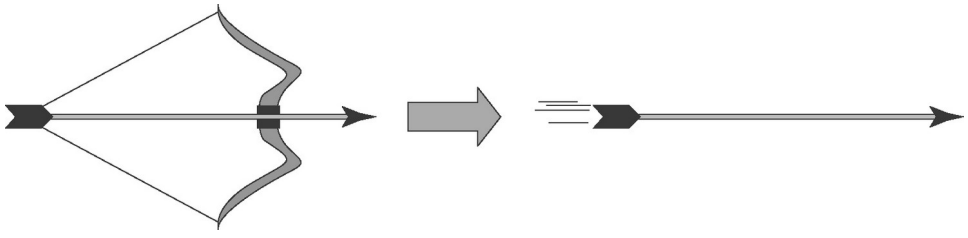

Classify each of the following examples into each category of potential energy.

Example	Category of potential energy
Air brakes in a truck	
Wound watch spring	
Kerosene	
Sugar	
Depressed trampoline canvas	
Comet	
Parachutist at the point of launch	

3. Energy transformation

Describe the energy transformation illustrated below.
