Worksheet 7.5

Summing up

Student: ..... Class: .....

Complete the statements below to compile a summary of this unit. The missing words can be found in the word list below.

1. All substances are made from extremely small particles called ..... .
2. Scientists were different from the alchemists because they had different beliefs and because they carried out careful ..... .
3. Substances that contain only one type of atom are called ..... .
4. Metals are good conductors of heat and ..... .
5. Metals are malleable, which means they can be ..... . They are also ....., which means that they can be made into a wire.
6. Solid non-metals are either dull or glassy and are usually ..... .
7. Some elements have features of both metals and non-metals. These are called the ..... .
8. Twenty-two of the elements are non-metals, the rest are ..... or metalloids.
9. The elements are organised into the ....
10. The three types of particles inside an atom are protons, neutrons and ..... .
11. It is the number of ..... in each atom that makes one element different from another.
12. Inside an atom there is a nucleus surrounded by an electron shell, but the atom is mostly ....
13. There are over ..... hundred different kinds of atoms.
14. Metals are obtained from ..... that are found in rocks.
15. ..... are substances that contain more than one element bonded together.
16. Compounds are usually very ..... from the elements of which they are made.
17. Water is a compound made from the elements hydrogen and ..... .
18. The element ..... can be found in diamonds, graphite and charcoal.

elements	empty	bent	different
electrons	space	atoms	experiments
periodic	protons	ductile	oxygen
table	metalloids	brittle	
metals	one	minerals	
carbon	electricity	compounds
